### YX-ZJJ-170/400 Automatic Folding Napkin Paper Machine

**Brief Introduction of Equipment:**

1. The structure of 170/210 type machine is almost same as that of 220/400 type. The minor difference is just among the sizes of parts.
2. Embossing pattern on the paper is from the special embossing roll. So the embossment is very clear.
3. Stepless adjustment is adopted to unwind the jumbo roll. The whole machine work synchronously. That can produce raw paper of the quality of high, common or low grade.
4. Design for tension on paper, embossing, folding, cutting and others is good. The finished product is perfect.
5. There are automatic calculation and stacking on output part of machine to meet the customers' demand for packing.

**Main Technical Parameter:**

Type	Production speed(m/min)	Machine power Kw(380V/50Hz)	Overall size (L x W x H m)	Weight (Tons)	Specification of jumbo roll (Width x diameter mm)
170/210	120 ~ 250	3.0	4.5 x 0.85 x 1.4	0.9	170/210 x 1200 13 ~ 22 g/m <sup>2</sup> (2ply)
220/400	1020 ~ 160	3.7	5.2 x 1.0 x 1.5	1.0	220/400 x 1200 13 ~ 22 g/m <sup>2</sup> (2ply)

**According TO The Request of Customers:**

\* It can be equipped with 1 N6 colors offset printing pictures or trademarks.
